ProLite

LCD Monitor

ENGLISH

ProLite B2475HDS
ProLite E2475HDS

Thank you very much for choosing the iiyama LCD monitor.

We recommend that you take a few minutes to read carefully through this brief but comprehensive manual before installing and switching on the monitor. Please keep this manual in a safe place for your future reference.

**Dear user, we congratulate you
on the purchase of your iiyama LCD.**

For details on warranty and locally used pixel policies that apply directly after installation of your product please check the iiyama website.

**To report a fault, please contact
your local support centre found at www.iiyama.com/service**

Things to check before you call the iiyama information line

- | if the power cable is connected securely and turned on?
- | if the display has been turned on?
- | if the signal cable is connected securely and the correct input selected?
- | if the computer has been restarted with the display connected?
- | if the graphics card is correctly installed with the latest drivers possible?
- | if the correct native resolution has been selected via 'Display Properties'?
- | If the R/G/B signal configuration is correct?
- | if the displays On Screen Menu is shown?
- | if the correct brightness and contrast settings have been set?
- | if given display tolerances and compatibility have been considered?
- | if via the On Screen Menu you have performed a Factory Reset/Recall?

Before reporting the screen defect, please prepare the following information/evidence:

- | model number *
- | purchase receipt and serial number *
- | name and address for collection
- | telephone/fax number, for availability during the day
- | convenient collection date (date, time)
- | short description of the defect

Important Note:

If there is no fault found in the collected equipment after inspection, the transferring party shall incur charges for transport and administration.

If you have checked all of the above and there is still no picture, call our information line for assistance in your country.

* see the identification plate on the back of the case.

Congratulations!

This display is designed for both you and the planet!

The display you have just purchased carries the TCO Certified label. This ensures that your display is designed, manufactured and tested according to some of the strictest quality and environmental requirements in the world. This makes for a high performance product, designed with the user in focus that also minimizes the impact on the climate and our natural environment.

TCO Certified is a third party verified program, where every product model is tested by an accredited impartial test laboratory. TCO Certified represents one of the toughest certifications for displays worldwide.

Some of the Usability features of the TCO Certified for displays:

- Visual ergonomics for good image quality is tested to ensure top performance and reduce sight and strain problems. Important parameters are luminance, contrast, resolution, black level, gamma curve, colour and luminance uniformity and colour rendering
- Products are tested according to rigorous safety standards at impartial laboratories
- Electric and magnetic fields emissions as low as normal household background levels
- Low acoustic noise emissions (When applicable)

Some of the Environmental features of the TCO Certified for displays:

- The brand owner demonstrates corporate social responsibility and has a certified environmental management system (EMAS or ISO 14001)
- Very low energy consumption both in on- and standby mode minimize climate impact
- Restrictions on chlorinated and brominated flame retardants, plasticizers, plastics and heavy metals such as cadmium, mercury and lead (RoHS compliance)
- Both product and product packaging is prepared for recycling
- The brand owner offers take-back options

The requirements can be downloaded from our web site. The requirements included in this label have been developed by TCO Development in co-operation with scientists, experts, users as well as manufacturers all over the world. Since the end of the 1980s TCO has been involved in influencing the development of IT equipment in a more user-friendly direction. Our labeling system started with displays in 1992 and is now requested by users and IT-manufacturers all over the world. About 50% of all displays worldwide are TCO certified.

Technology for you and the planet

This LCD monitor complies with the requirements of the EC Directive 2004/108/EC "EMC Directive", 2006/95/EC "Low Voltage Directive" and 2009/125/EC "ErP Directive".

The electro-magnetic susceptibility has been chosen at a level that gives correct operation in residential areas, business and light industrial premises and small-scale enterprises, inside as well as outside of the buildings. All places of operation are characterised by their connection to the public low voltage power supply system.

IYYAMA CORPORATION: Breguetlaan 8, 1438BC Oude Meer The Netherlands

A certified power supply cord has to be used with this equipment. The relevant national installation and/or equipment regulations shall be considered. A certified power supply cord not lighter than ordinary polyvinyl chloride flexible cord according to IEC 60227 (designation H05VV-F 3G 0.75mm²) shall be used.

For displays with glossy bezels the user should consider the placement of the display as the bezel may cause disturbing reflections from surrounding light and bright surfaces.

We recommend recycling of used product. Please contact your dealer or iiyama service center. Recycle information is obtained via the Internet, using the address:
<http://www.iiyama.com>

You can access the Web page of different countries from there.

- We reserve the right to change specifications without notice.
- All trademarks used in this user manual are the property of their respective owners.
- As an ENERGY STAR® Partner, iiyama has determined that this product meets the ENERGY STAR® guidelines for energy efficiency.

FOR YOUR SAFETY

WARNING

ENGLISH

If you notice any abnormal phenomena such as smoke, strange sounds or fumes, unplug the monitor and contact your dealer or iiyama service center immediately. Further use may be dangerous and can cause fire or electric shock.

High voltage circuits are inside the monitor. Removing the cabinet may expose you to the danger of fire or electric shock.

Do not put any solid objects or liquids such as water into the monitor. In case of an accident, unplug your monitor immediately and contact your dealer or iiyama service center. Using the monitor with any object inside may cause fire, electric shock or damage.

The monitor may cause an injury if it falls or is dropped.

Do not use where water may be splashed or spilt onto the monitor as it may cause fire or electric shock.

Be sure to operate the monitor only with the specified power supply. Use of an incorrect voltage will cause malfunction and may cause fire or electric shock.

Do not pull or bend the power cable and signal cable. Do not place the monitor or any other heavy objects on the cables. If damaged, the cables may cause fire or electric shock.

It is advisable not to operate the monitor during a heavy thunder storm as the continual breaks in power may cause malfunction. It is also advised not to touch the plug in these circumstances as it may cause electric shock.

CAUTION

Do not install the monitor where sudden temperature changes may occur, or in humid, dusty or smoky areas as it may cause fire, electric shock or damage. You should also avoid areas where the sun shines directly on the monitor.

The monitor may topple and cause injury if not suitably located. Please also ensure that you do not place any heavy objects on the monitor, and that all cables are routed such that children may not pull the cables and possibly cause injury.

Ventilation slots are provided to keep the monitor from overheating. Covering the slots may cause fire. To allow adequate air circulation, place the monitor at least 10 cm (or 4 inches) from any walls. Do not remove the tilt stand when operating the monitor. Ventilation slots on the back of the cabinet will be blocked and the monitor may overheat if the stand is removed. This may cause fire or damage. Operating the monitor on its back, side, upside down or on a carpet or any other soft material may also cause damage.

When you move the monitor, turn off the power switch, unplug the monitor and be sure the signal cable is disconnected. If you do not disconnect them, it may cause fire or electric shock.

If the monitor is not in use for a long period of time it is recommended that it is left unplugged to avoid accidents.

To disconnect the power cable or signal cable, always pull it by the plug. Never pull on the cable itself as this may cause fire or electric shock.

Pulling or inserting the plug with wet hands may cause electric shock.

Be sure the computer is strong enough to hold the weight of the monitor, otherwise, you may damage your computer.

- Careful attention is required not to catch your fingers or hands when you change the height or the angle.
- Injury can occur if care is not taken to avoid finger contact with the displays base when adjusting the height. (Just for height adjustable model.)

The monitor is not designed to work for 24-hours continuously, do not use the monitor for 24-hours continuously.

OTHERS

To eliminate eye fatigue, do not operate the monitor against a bright background or in a dark room. For optimal viewing comfort, the monitor should be just below eye level and 40-60 cm (16-24 inches) away from your eyes. When using the monitor over a prolonged time, a ten minute break every hour is recommended as looking at the screen continuously can cause eye strain.

2 FOR YOUR SAFETY

[Downloaded from ManualMonitor.com](http://ManualMonitor.com) Manuals

BEFORE YOU OPERATE THE MONITOR

The following accessories are included in your package. Check to see if they are enclosed with the monitor. If anything is missing or damaged, please contact your local iiyama dealer or regional iiyama office.

- | | | |
|-----------------------------|----------------------|-----------------------|
| ■ Power Cable ^{*1} | ■ D-Sub Signal Cable | ■ DVI-D Signal Cable |
| ■ Audio Cable | ■ Stand-Base | ■ Stand ^{*2} |
| ■ Safety Guide | ■ Quick Start Guide | |

^{*1} The rating of the Power Cable enclosed in 120V area is 10A/125V. If you are using a power supply higher than this rating, then a power cable with a rating of 10A/250V must be used. However, all guarantees and warranties are void for any problems or damage caused by a power cable not supplied by iiyama.

^{*2} Accessory for ProLite E2475HDS.

- Put the monitor on a stable surface. The monitor may cause injury or damage if it falls or is dropped.
- Do not give a strong impact to the monitor. It may cause damage.
- Unplug the monitor before removal or installation to avoid electric shock or damage.

<Installation>

- ① Put a piece of soft cloth on the table beforehand to prevent the monitor from being scratched. Lay the monitor flat on a table with front face down.
- ② Hold the monitor and push the Stand until it clicks and is secure.
- ③ Hold the monitor and push the Stand-Base until it clicks and is secure.

<Removal>

- ① Put a piece of soft cloth on the table beforehand to prevent the monitor from being scratched. Lay the monitor flat on a table with front face down.
- ② Press and hold the hooks inside, and pull the Stand-Base.
- ③ There are two locks inside of the Stand, unlock them by thin stick and pull the Stand away from the monitor.

<Front>

<Back>

- ① Power Switch ()
- ② Menu Button (MENU)
- ③ + / Volume Button (+ / )
- ④ Power Indicator
 - Blue: Normal operation
 - Orange: Power Management

- ⑤ - / ECO Button (- / )
- ⑥ Auto Button (AUTO)
- ⑦ Speakers
- ⑧ Audio Connector ()
- ⑨ D-SUB mini 15pin Connector (D-SUB)
- ⑩ DVI-D 24pin Connector (DVI)
- ⑪ HDMI Connector (HDMI)
- ⑫ Cable holder
- ⑬ AC Connector (AC IN)
- ⑭ Keyhole for Security Lock

You can fasten a security lock and cable to prevent the monitor from being removed without your permission.

<Front>

<Back>

- ① Power Switch ()
- ② Menu Button (MENU)
- ③ + / Volume Button (+/ )
- ④ Power Indicator
 - Blue: Normal operation
 - Orange: Power Management

- ⑤ - / ECO Button (- / )
- ⑥ Auto Button (AUTO)
- ⑦ Speakers
- ⑧ Audio Connector ()
- ⑨ D-SUB mini 15pin Connector (D-SUB)
- ⑩ DVI-D 24pin Connector (DVI)
- ⑪ HDMI Connector (HDMI)
- ⑬ AC Connector (AC IN)
- ⑭ Keyhole for Security Lock

You can fasten a security lock and cable to prevent the monitor from being removed without your permission.

- ① Ensure that both the computer and the monitor are switched off.
- ② Connect the computer to the monitor with the signal cable.
- ③ Connect the monitor to the audio equipment with the Audio Cable for computer when using the audio features.
- ④ Connect the Power Cable to the monitor first and then to the power supply.
- ⑤ Turn on your monitor and computer.

- The signal cables used for connecting the computer and monitor may vary with the type of computer used. An incorrect connection may cause serious damage to both the monitor and the computer. The cable supplied with the monitor is for a standard 15 pin D-Sub connector. If a special cable is required please contact your local iiyama dealer or regional iiyama office.
- For connection to Macintosh computers, contact your local iiyama dealer or regional iiyama office for a suitable adaptor.
- Make sure you tighten the finger screws at each end of the signal cable.

[Example of Connection]

[Collect Cables]

- A Put the cables through the cable holder.
- B Collect cables at the back of the stand.

- ① Ensure that both the computer and the monitor are switched off.
- ② Connect the computer to the monitor with the signal cable.
- ③ Connect the monitor to the audio equipment with the Audio Cable for computer when using the audio features.
- ④ Connect the Power Cable to the monitor first and then to the power supply.
- ⑤ Turn on your monitor and computer.

- The signal cables used for connecting the computer and monitor may vary with the type of computer used. An incorrect connection may cause serious damage to both the monitor and the computer. The cable supplied with the monitor is for a standard 15 pin D-Sub connector. If a special cable is required please contact your local iiyama dealer or regional iiyama office.
- For connection to Macintosh computers, contact your local iiyama dealer or regional iiyama office for a suitable adaptor.
- Make sure you tighten the finger screws at each end of the signal cable.

[Example of Connection]

■ Signal Timing

Change to the desired signal timing listed on page 29: COMPLIANT TIMING.

■ Windows 95/98/2000/Me/XP/Vista/7 Plug & Play

The iiyama LCD monitor complies with DDC2B of VESA standard. The Plug & Play function runs on Windows 95/98/2000/Me/XP/Vista/7 by connecting the monitor to DDC2B compliant computer with the Signal Cable supplied.

For installation on Windows 95/98/2000/Me/XP: The monitor Information File for iiyama monitors may be necessary for your computer and obtained via the Internet, using the address:

<http://www.iiyama.com>

- For additional information on how to download the driver for your touch screen monitor, please access the internet site noted above.
- Monitor Drivers are not required in most cases for Macintosh or Unix operating systems. For further information, please contact your computer dealer first for advice.

- For optimal viewing it is recommended to look at the full face of the monitor.

- Hold the stand so that the monitor does not topple when you change the monitor's angle.

- You are able to adjust the monitor's angle up to 20 degrees upward, 5 degrees downward.

- In order to ensure a healthy and relaxed body position when using the monitor at visual display workstations, it is recommended that the adjusted tilt angle should not exceed 10 degrees. Adjust the monitor's angle to your own preference.

- Do not touch the LCD screen when you change the angle. It may cause damage or break the LCD screen.

- Careful attention is required not to catch your fingers or hands when you change the angle.

- Do not tilt the post beyond 20 degrees except when repacking the monitor in its box.

To do so may cause the monitor to fall over and break.

- For optimal viewing it is recommended to position yourself directly opposite to the full face of the monitor, then adjust the monitor's height and angle to your own preference.
- Hold the panel so that the monitor does not topple when you change the monitor's height or angle.
- You are able to adjust the monitor's height up to 110mm, angle up to 170 degrees right and left, 20 degrees upward, 3 degrees downward.

- Do not touch the LCD screen when you change the height or the angle. It may cause damage or break the LCD screen.
- Careful attention is required not to catch your fingers or hands when you change the height or the angle.
- Injury can occur if care is not taken to avoid finger contact with the displays base when adjusting the height.

A Adjust the mother's height.

B Rotate the panel 90 degrees.

Portrait: Turn clockwise.

Landscape: Turn counter clockwise.

- Attempting to rotate without fully extending upward may cause damage to stand.
- Video card for portrait display will be required for rotating the image on the screen.

C Adjust the monitor's angle to your preference.

OPERATING THE MONITOR

To create the best picture, your iiyama LCD monitor has been preset at the factory with the COMPLIANT TIMING shown on page 29. You are also able to adjust the picture by following the button operation shown below. For more detailed adjustments, see page 17 for SCREEN ADJUSTMENTS.

Press the MENU Button to start the On Screen Display feature. There are additional Menu items which can be switched by using the + / - Buttons.

- B Select the Menu item which contains the adjustment icon relating to the adjustment you want to make. Press the MENU Button. Then, use the + / - Buttons to highlight the desired adjustment icon.**
- C Press the MENU Button again. Use the + / - Buttons to make the appropriate adjustment or setting.**
- D Press the AUTO Button to leave the menu, and the settings you just made would be automatically saved.**

For example, to correct for vertical position, select Menu item of Image Setup and then press the MENU Button. Then, select V.Position by using the + / - Buttons.

An adjustment page appears after you press the MENU Button. Then, use the + / - Buttons to change the vertical position settings. The vertical position of the overall display should be changing accordingly while you are doing this.

Press the AUTO Button lastly, it ends, all changes are saved in the memory.

- When button operations are aborted during adjustment, On-Screen Display disappears when the time set for the Timeout has passed. Also, the AUTO button can be used to return previous menu and turn off the On-Screen Display.
- Any changes are automatically saved in the memory when the On Screen Display disappears. Turning off the power should be avoided while using the Menu.
- Adjustments for H. / V. Position, Clock and Phase are saved for each signal timing. Except for these adjustments, all other adjustments have only one setting which applies to all signal timings.

Luminance

Adjustment Item	Problem / Option		Button to Press
Contrast	Too dull		 
	Too intense		 
Brightness *	Too dark		 
	Too bright		 
Eco	Off	Normal	
	Mode1	Brightness of back-light is reduced.	
	Mode2	Brightness of back-light is reduced more than Mode1.	
	Mode3	Brightness of back-light is reduced more than Mode2.	
i-Style Color	Standard	For general windows environment and monitor default setting.	
	Text	For text editing and viewing in a word processing environment.	
	Internet	For internet environment.	
	Game	For PC game environment.	
	Movie	For movie and video environment.	
	Sports	For sport environment.	
ACR	On	Increased Contrast Ratio	
	Off	Typical Contrast Ratio	

ACR adjusts brightness according to the image, and improve the contrast ratio during move playing.

Contrast, Brightness, sRGB, Eco and i-Style Color cannot be adjusted and selected while ACR is active.

* Adjust the Brightness when you are using the monitor in a dark room and feel the screen is too bright.

You can skip the Menu items and display an adjustment scale directly by using the following button operations.

- ECO: Press the - Button when the Menu is not displayed.

Color Temp.

Adjustment Item	Problem / Option		Button to Press
Gamma	Mode1	Normal	
	Mode2	High contrast	
	Mode3	Dark	
Color Temp.	Warm	Greenish white	
	Normal	Yellowish white	
	Cool	Bluish white	
	User	User-R	Too weak  
		User-G	
		User-B	Too strong  
	sRGB	sRGB	

■ sRGB is an international standard which defines and unifies the difference of color appearance between equipment.

■ You can not adjust the Brightness, Contrast, Gamma and Eco during sRGB mode because those settings are locked.

OSD OSD Setup

Adjustment Item	Problem / Option				Button to Press
H.Position	OSD is too left				 
	OSD is too right				 
V.Position	OSD is too low				 
	OSD is too high				 
Timeout	You can set the OSD display duration time between 5 and 60 seconds.				 
Language	English	English	Portuguese	Portuguese	
	Deutsch	German	简体中文	Simplified Chinese	
	Français	French	Русский	Russian	
	Español	Spanish	日本語	Japanese	
	Italiano	Italian			

- C Pressing and holding of the ▼ Button for about 2 seconds. (Auto Image Adjust)
- D Adjust the image manually by following procedure below when the screen has a flicker or blur, or the picture does not fit in the display area after performing the Auto Image Adjust.
- E Adjust the V.Position so that the top and bottom of the picture frame will fit to the display area.

- F 1) Adjust the H.Position so that the left side of the picture frame will move to the left edge of the display area.

- 2) Stretch the right side of the picture frame to the right edge of the display area by adjusting the Clock.

- When the left side of the picture frame moves apart from the left edge of the display area during the Clock adjustment, adjust steps 1) and 2).
- Another way to make the Clock adjustment is to correct the vertical wavy lines in the zebra pattern.
- The picture may flicker during the Clock, H.Position and V.Position adjustment.
- In case the picture frame is bigger or smaller than the data display area after the Clock adjustment, repeat steps from C.

- G Adjust the Phase to correct horizontal wavy noise, flicker or blur in the zebra pattern.**

- In case the strong flicker or blurs remain on a part of the screen, repeat steps F and G because the Clock may not be adjusted correctly. If the flicker or blurs still remain, set the refresh rate of computer to low (60Hz) and repeat steps from C again.
- Adjust the H.Position after the Phase adjustment if the horizontal position moves during the adjustment.

- H Adjust the Brightness and Color to get the desired picture after you complete the Clock and Phase adjustments.**

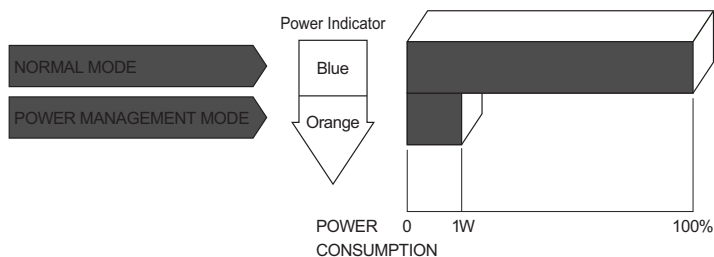

Put back your favorite wallpaper.

The power management feature of this product complies with power saving requirement of ENERGY STAR® and VESA DPMS. When activated, it automatically reduces unnecessary power consumption of the monitor when your computer is not in use.

To use the feature, the monitor needs to be connected to a VESA DPMS compliant computer. There is a power management step the monitor takes as described below. The power management function, including any timer settings is configured by the operating system. Check your operating system manual for information on how this can be configured.

■ Power Management Mode

When the H-sync signal / V-sync signal / H and V sync signals from the computer are off, the monitor enters into Power Management Mode which reduces the power consumption to less than 1W. The screen becomes dark, and the power indicator turns to orange. From Power Management Mode, the image reappears in several seconds when either the keyboard or the mouse are touched again.

- Even when using the power management mode, the monitor consumes electricity. Turn off the Power Switch whenever the monitor is not in use, during the night and weekends, to avoid unnecessary power consumption.
- It is possible that the video signal from the computer may be on while the H or V sync signal is missing. In this instance, the POWER MANAGEMENT feature may not work properly.

TROUBLE SHOOTING

If the monitor fails to operate correctly, please follow the steps below for a possible solution.

1. Perform the adjustments described in OPERATING THE MONITOR, depending on the problem you have. If the monitor does not get a picture, skip to 2.
2. Consult the following items if you cannot find an appropriate adjustment item in OPERATING THE MONITOR or if the problem persists.
3. If you are experiencing a problem which is not described below or you cannot correct the problem, discontinue using the monitor and contact your dealer or iiyama service center for further assistance.

- ☐ The Power Cable is firmly seated in the socket.
- ☐ The Power Switch is turned ON.
- ☐ The AC socket is live. Please check with another piece of equipment.
- ☐ If the blank screen saver is in active mode, touch the keyboard or the mouse.
- ☐ Increase the Contrast and/or Brightness.
- ☐ The computer is ON.
- ☐ The Signal Cable is properly connected.
- ☐ The signal timing of the computer is within the specification of the monitor.
- ☐ If the monitor is in power management mode, touch the keyboard or the mouse.
- ☐ The computer is ON.
- ☐ The Signal Cable is properly connected.
- ☐ The signal timing of the computer is within the specification of the monitor.
- ☐ The Signal Cable is properly connected.
- ☐ The signal timing of the computer is within the specification of the monitor.
- ☐ The video output level of the computer is within the specification of the monitor.
- ☐ The signal timing of the computer is within the specification of the monitor.

- ☐ The video output level of the computer is within the specification of the monitor.
- ☐ The power voltage is within the specification of the monitor.
- ☐ The signal timing of the computer is within the specification of the monitor.

- ☐ The audio equipment (computer etc.) is ON.
- ☐ The Audio Cable is properly connected.
- ☐ The Volume is turned up.
- ☐ The audio output level of the audio equipment is within the specification of the monitor.
- ☐ The audio output level of the audio equipment is within the specification of the monitor.
- ☐ The Audio Cable is properly connected.

RECYCLING INFORMATION

For better environment protection please don't dispose your monitor.
Please visit our web site: www.iiyama.com/recycle for monitor recycling.
